

Urban Commute

A close-up photograph of a hand holding a red pushpin, about to pin it to a technical drawing on a grid background. The drawing features various lines and hatching. In the foreground, several other red pushpins are scattered on the grid, slightly out of focus. The overall scene suggests a process of planning or design.

The Problem:

The issue is the inconvenience and time-consuming nature of **juggling multiple transportation apps** to plan and execute daily trips in urban areas.

The Solution.

UrbanCommute simplifies urban commuting by providing an all-in-one platform that allows users to plan, choose, and view their trips in a single app.

About UrbanCommute

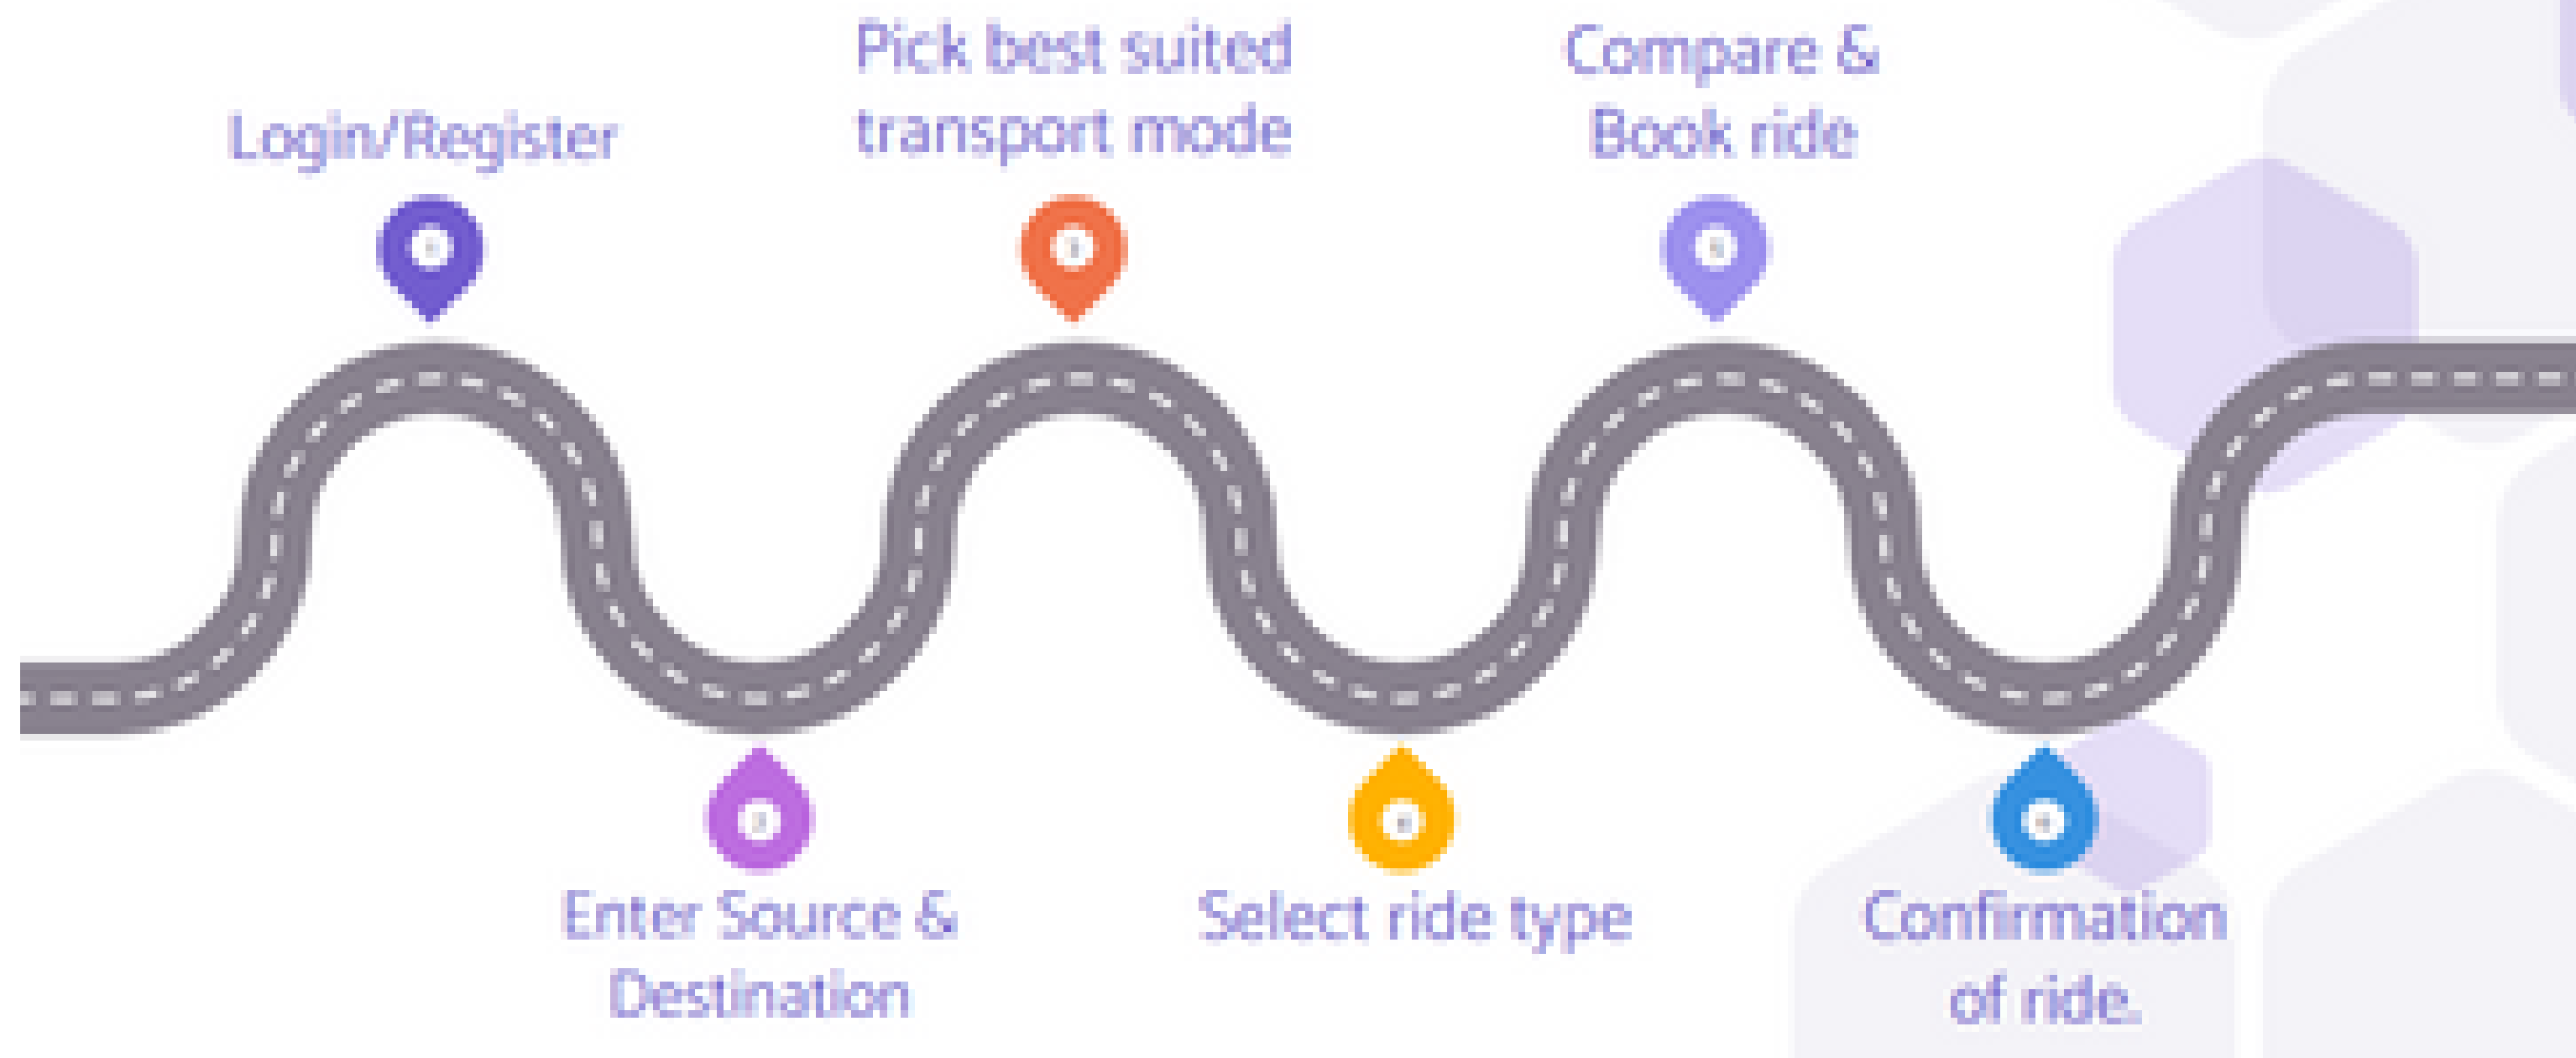

UrbanCommute **simplifies urban commuting** by integrating trip planning features such as *public transport schedules, ride-hailing booking, and trip cost estimation* into a **single mobile application**.

***"Revolutionize your urban
commute experience with
the all-in-one solution -
UrbanCommute app."***

The User flow

Why UrbanCommute ?

Convenience

Efficiency

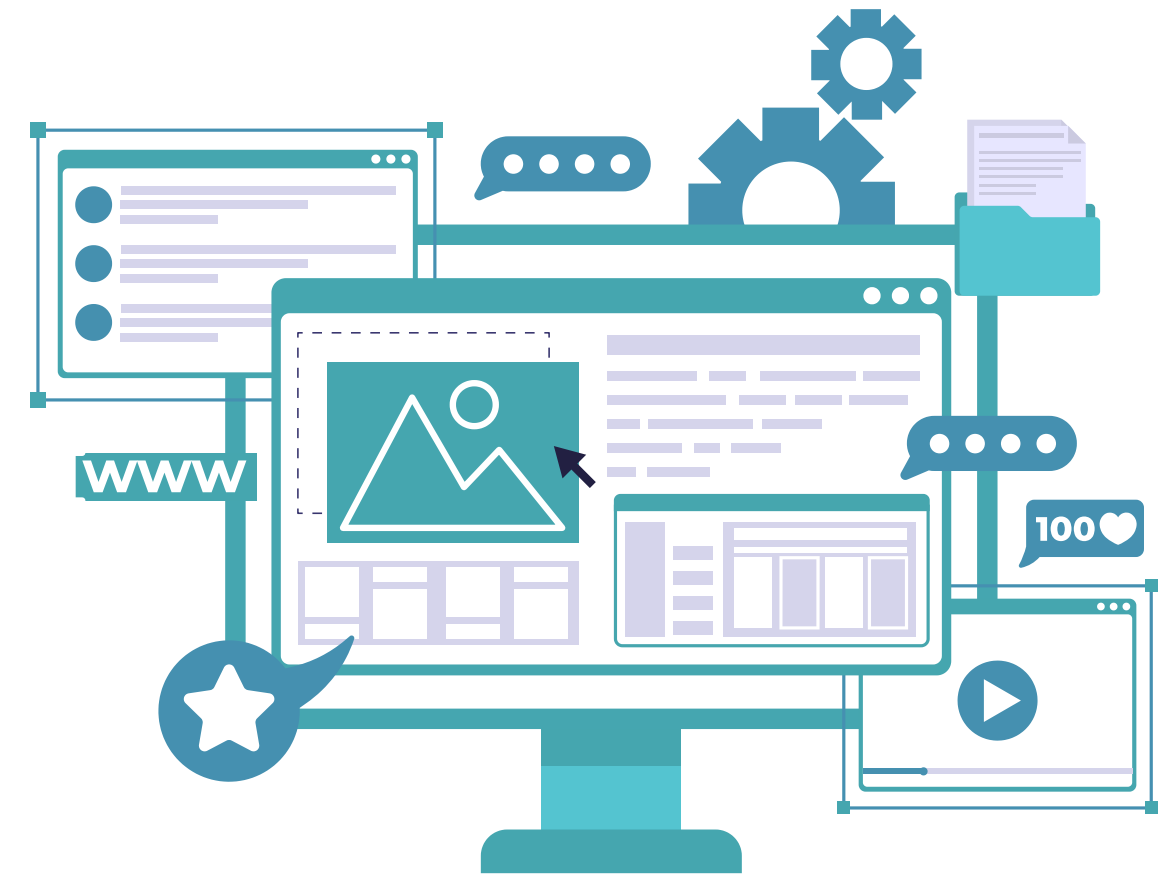

Integration

Simplification

The Future...

And we don't just stop here...

- Growth of private-vehicle ownership
- Declining share of public transport
- Road accidents
- Congestion
- And more...

Thank
you

Why a Mole?

The mole is a suitable symbol for the UrbanCommute app because it represents the app's ability to **navigate through the complexities of urban commuting and find the best route** to reach the user's destination. It also conveys the **app's user-friendly and approachable nature.**
